

Looking for a unique field trip opportunity?

Join us on
March 23, 2018
in Dallas, TX

The Discovery Institute's **Center for Science and Culture** is excited to offer this unique field trip opportunity for parents and teachers to introduce their students to the scientific challenges to Darwinian evolution and the evidences for **intelligent design** in nature. Recommended for private school and home educators and their high school students 9th grade and above.

Scientific inquiry at its finest!

As an educator, one of the best things you can do for your students is to encourage open inquiry - especially in the sciences! By joining the **ID Education Day**, both you and they will be introduced to a few of the leading scientists and scholars in the movement, including German paleo-entomologist **Günter Bechly**, philosopher of science **Stephen Meyer**, historian of science **Mike Keas**, and physicist **Brian Miller**. Throughout the day, your students will be able to ask questions and dialogue with the speakers.

When:

Friday, March 23, 2018
9:45 am - 2:15 pm
(Doors open at 9:00 am)

Where:

Park Cities Baptist Church
Community Life Center - CLC 300
3933 Northwest Pkwy, Dallas, TX 75225

Cost: This is a **FREE** event, but registration is required. Lunch is not provided, so you are encouraged to bring you own sack lunch or walk to a nearby restaurant.
